Top print technology and ease of use

The Lexmark X6170 boasts the inkjet technology that has advanced Lexmark to the forefront of the consumer imaging market. Capable of 4800 x 1200 dpi (5.76 pixels) in black and colour, the Lexmark X6170 will impress home and office users with its photo-realistic output and precise laser quality text.

The X6170 is capable of fast print speeds up to 19 pages per minute (ppm) in black and up to 15 ppm in colour. Also, Accu-Feed™ paper handling technology accommodates a wide range of media, including labels and envelopes.

Standalone black and colour photocopying at the touch of a button

The X6170 AIO lets users copy text documents, colour graphics and even colour photographs at the touch of a button, without having to turn on the computer. Users also have the option of reducing or enlarging images from 25 to 400 percent of their original size.

Copy

Dynamic flatbed scanner

Scan

With industry-leading CCD flatbed scanning technology, the Lexmark X6170 can handle documents, photographs and books of varied thickness. This high-resolution scanner captures the finest detail, with 4800 ppi optical resolution and 48-bit true colour.

ABBYY FineReader Sprint Optical Character Recognition converts scanned paper documents into editable computer files.

Stand-alone faxing or fax direct from your PC

The X6170 supports stand-alone faxing, with a built-in 33.6kpbs fax.

Automatic Document Feeder (ADF)

With a 50 page ADF, scanning and faxing multi-page documents has never been easier or faster. Users no longer need to waste time scanning pages one at a time.

Using the Print-to-fax capability – send faxes with cover page directly from your PC through the All-In-One fax modem.

Fax

Added capabilities

Bundled software further enhances the Lexmark X6170's functionality to improve the efficiency of home-office users: Lexmark X6100 Series All-In-One Office Center – allows integrated photo-editing and photo sizing, 'red-eye' removal, colour manipulation and automatic cartridge alignment.

The ultimate office centre for professional results.

What is an Automatic Document Feeder (ADF)?

An automatic document feeder (ADF) is a device that allows a flatbed scanner to easily handle multi-page documents.

Does this printer have a warranty?

When you purchase the Lexmark X6170 you automatically receive a 1-Year On-Site Exchange Warranty. That means you receive FREE technical support, and if our printer experts can't solve your problem over the phone, we'll send a replacement printer to your door by express courier.

What is automatic cartridge alignment?

Automatic cartridge alignment eliminates the need for manual alignment. An optical sensor reads the alignment page and automatically updates the printer settings.

What is automatic paper type sensing?

With this function the printer automatically recognizes different paper types and adjusts the printer settings for optimal print quality.

What is a Charge-Coupled Device (CCD) Scanner?

A CCD scanner provides better quality scans and great results when scanning 3D or raised objects, as shown below.

Lexmark X6170 CCD Scanner

Why are Genuine Lexmark Cartridges better?

Cartridges are where all the printing takes place. They are what enable us to achieve amazing 4800x1200 dpi. Genuine Lexmark ink cartridges are attached to the actual printhead, in one piece – sealed together. Many other cartridges use individual ink tanks, these aren't sealed and they also require auto-cleaning cycles to keep air out of the printhead, wasting ink every time you turn the printer on. Buying a Lexmark genuine ink cartridge is like replacing your printer, as you get a new printhead every time you replace your ink cartridge.
