

Caring for your printer and the environment.

Consumables designed to cut costs

Brother's Innobella original consumables utilise state-of-the-art technology to produce top quality prints time and time again whilst keeping your cost per page to a minimum. Long-lasting colours are vivid and true thanks to fade resistant inks and specially coated paper.

Energy efficient

Brother's new multifunction inkjet printers have the low power consumption, minimum noise emission, use of non-hazardous materials and a recycling-friendly design, that are all required to comply with ENERGY STAR and the renowned Blue Angel environmental standard. So you can rest assured that your multifunction printers have minimal impact on the environment - and your budget!

At your side

Brother's unique 12 month on-site warranty gives you the ultimate peace of mind that if something did go wrong, Brother would do their utmost to put it right.

Choose the right model for you...

Low cost. High performance.

The new compact multifunction inkjet printers from Brother.

Feature packed printers perfect for home users

Brother's latest compact multifunction inkjet printers are low cost, high performance machines, just what you need if you are looking for a flexible printer for home use... you'll benefit from having to find the space and costs for just one machine. Not only will you be able to produce high quality prints, copies and scans; just think of the convenience of being able to print laboratory-quality photographs straight from your camera when you get back from holiday.

▪ Save space, time and money ▪ Easy to use ▪ Fast and versatile

Fast colour printing

These multifunction inkjet printers offer impressive mono and colour print speeds and consistent high quality, whether you are printing your children's homework, colour flyers for the rugby club or your holiday photos. To save time you can even print direct from your USB memory stick without having to switch on the computer.

Professional copying

Mono and colour copying is available on all these multifunction printers at the touch of a button when you need it - you don't even have to switch on your PC. You can enlarge and reduce your documents or copy a multi-paged document onto just one sheet.

Hi-resolution colour scanning

You'll be amazed at the professional results you'll get from these easy to use machines - full of time and cost-saving features:

Scan directly to your USB memory stick (including scan to PDF)

Scan documents straight to a file on your computer

Scan an image directly to your photo application so it's ready for editing or printing

Scan to OCR (optical character recognition) giving you the ability to edit a pre-printed document

Network connectivity

Step up to the DCP-585CW for network ready capabilities 'out of the box'. At the touch of a button securely connect to a wireless network, perfect for today's digital lifestyle. You now have complete flexibility to work anywhere in your home, enabling you to break free from the home office. Not converted to wireless yet? Don't worry as a wired network is also built in, just simply plug in a cable to connect.

Laboratory-quality photo printing

Step up to the DCP-385C and DCP-585CW for even greater flexibility with your photograph printing. Use the 3.3" wide colour LCD screen and built-in photo enhance feature to edit your photographs directly before printing.

In a rush? With print speeds as low as 30 seconds per photograph and a dedicated 20 sheet photo paper tray, it's ready to print high quality photographs whenever you want to.

*Available on DCP-165C, DCP-385C and DCP-585CW models.

You can achieve high quality borderless photo printing with these new generation multifunction inkjet printers - so your photos will no longer sit in that camera for months on end any more. Why wait? Print them from home. And with Brother's four ink technology you can afford to print off copies for everyone.

Have fun with the Reallusion Face Filter® software provided FREE with your printer. From your PC put an end to red eye and flash reflections on all your photos - you can even airbrush out the odd wrinkle or two.

You can print straight from your camera using the PictBridge facility or use the media card centre* to print photographs straight from your media cards if you prefer.
