[Driver Installation for Mac OS X 10.10]
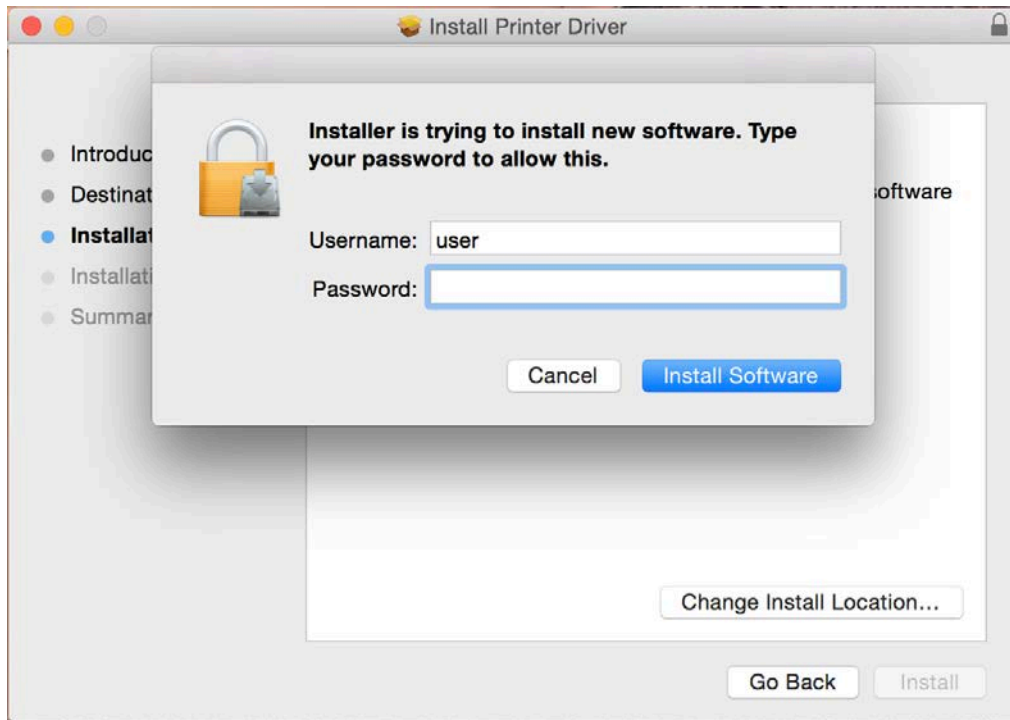

1. Insert the installation CD and run. Open the 'MAC_Installer' folder and run the 'Installer OS X.pkg file'.

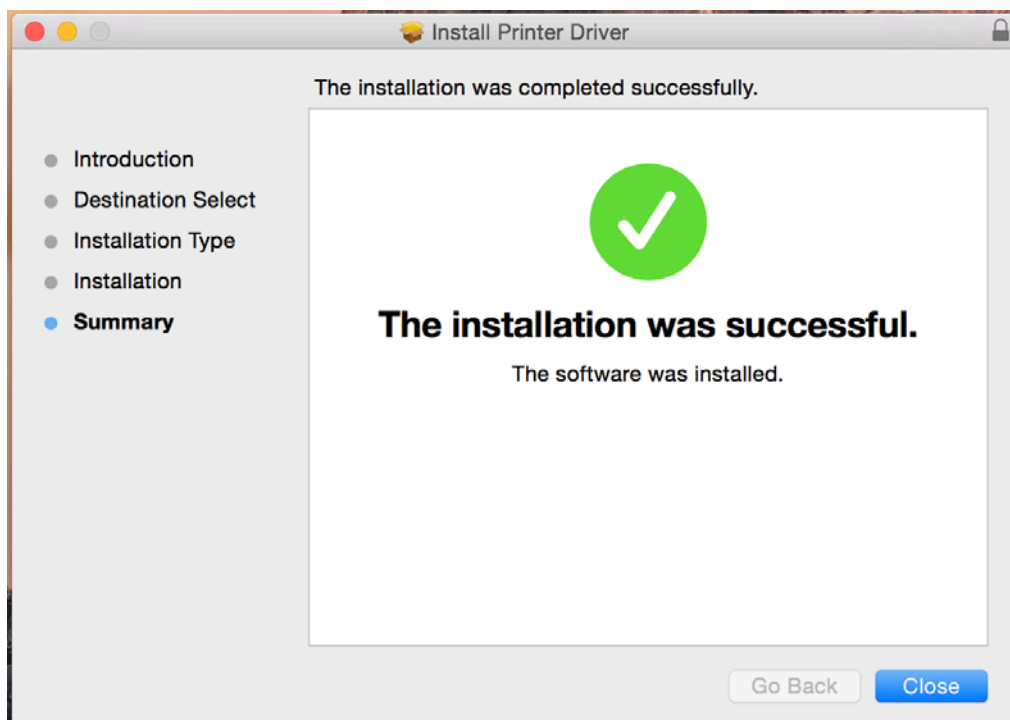

1-1. If you download over the Web, please unzip the file. Go to the 'PrinterDriver > MAC_Installer > MAC_Printer' path and run the 'Printer Driver.pkg'.

2. If the installer asks for a password, enter your user password.

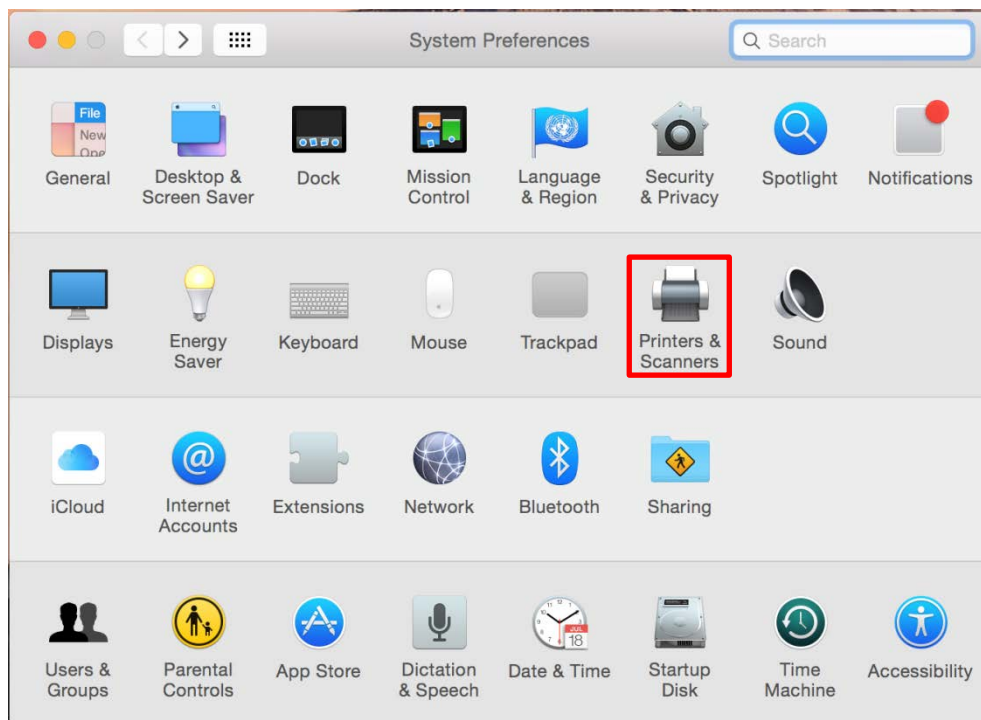

3. The installation is completed.

[Add a printer using the Socket protocol]

1. Run the 'System Preferences' from the Dock at the bottom.

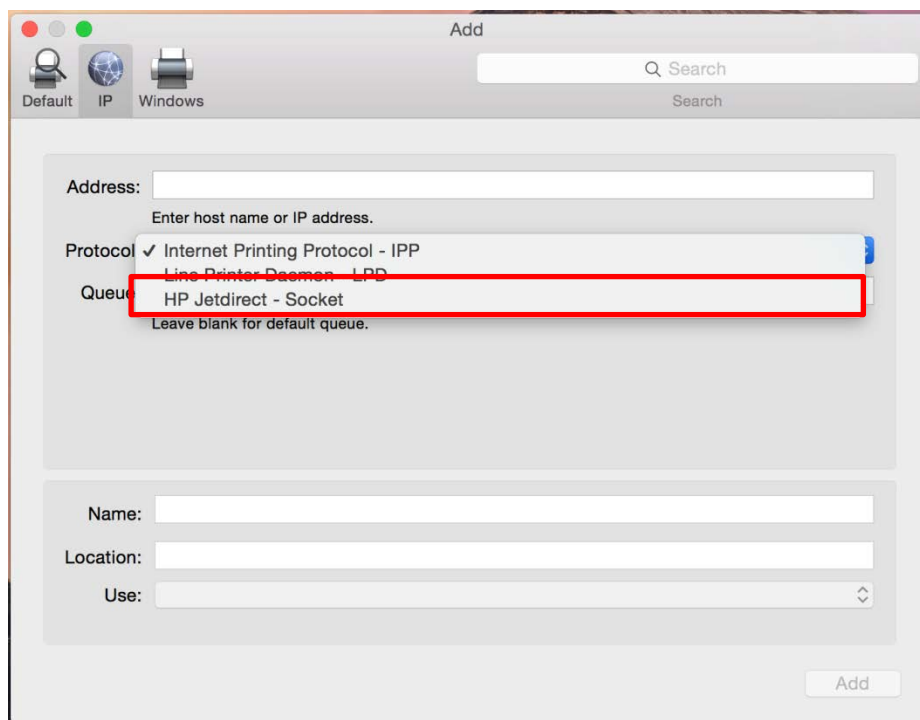

2. Click the 'Printer & Scanners'.

3. Click the '+' button.

4. Select the 'IP' at the top and choose a 'HP Jetdirect- Socket' in the 'Protocol' field.
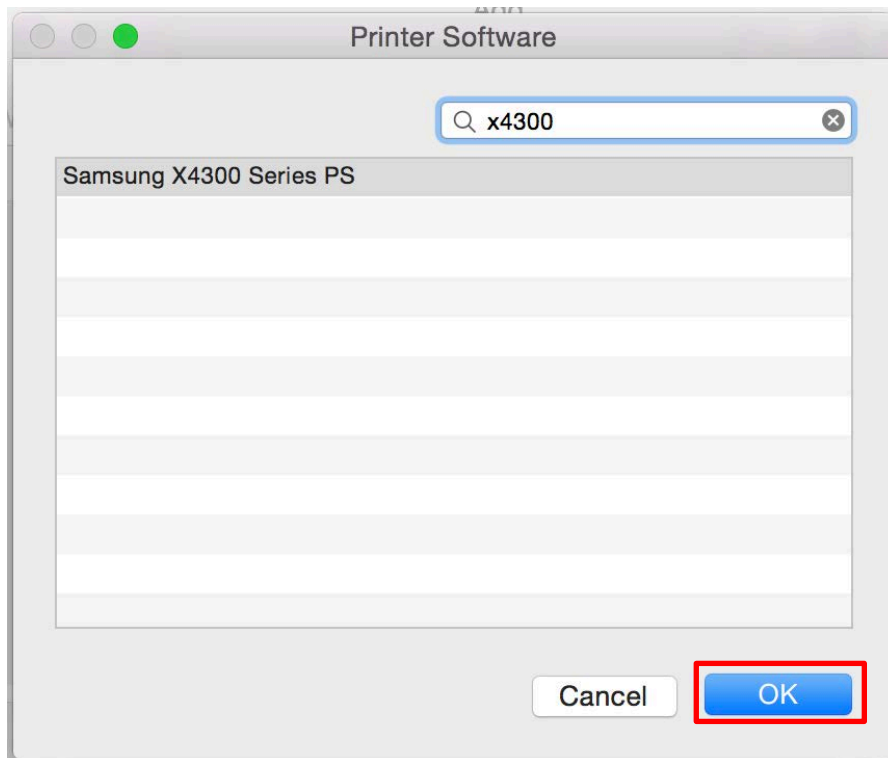

5. Enter the printer's IP in the 'Address' field, and enter the printer name to be used in the 'Name' field.

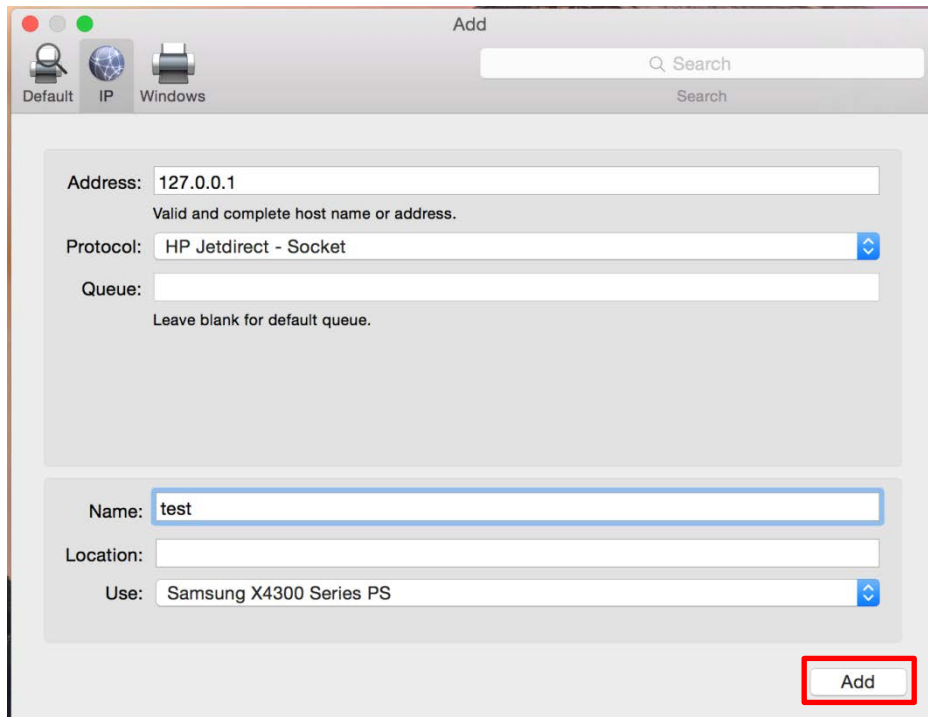

6. The printer driver is selected automatically in the 'Use' field. If not automatically selected, click on the 'Select Software...'.
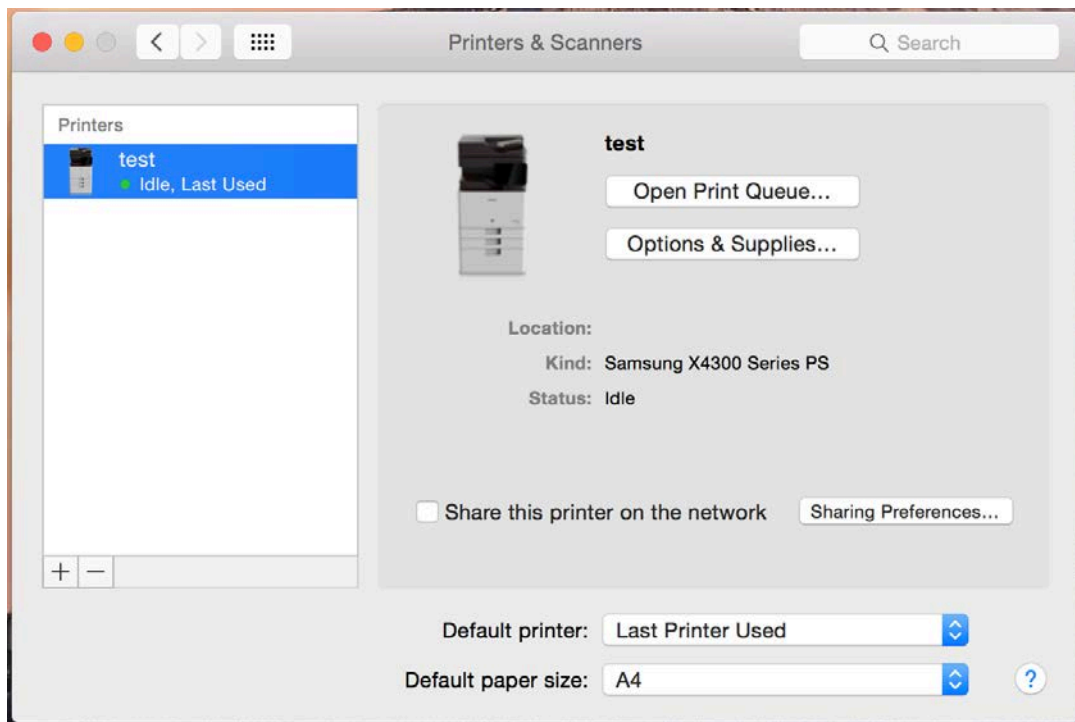

7. Search and choose the driver to install. And click on the 'OK'.

8. Click the 'Add' will add a printer.

9. Add the printer is complete.

10. When you open the print window in the document (shortcut : cmd+p), you can check the printer.
